

AGRIFOOD

4Future

**Life Long Learning of advisors and farmers as a tool
for innovation in the entire agri-food sector – the
AGRIFOOD4FUTURE pathway**

Co-funded by
the European Union

Irene Diti, PhD
Project Manager
Università Cattolica del Sacro Cuore

The **AGRIFOOD4FUTURE** is an Erasmus+ project aims to develop vocational training skills and educational programmes that meet the needs of the **"agriculture of the future"**

AF4F will contribute to the **transformation** of the agri-food sector towards **digitalization, decarbonisation and sustainability**.

AF4F will support the **large-scale implementation** of new and emerging **agriculture practices**, such as climate-smart agriculture, precision agriculture, regenerative and organic practices

AF4F will provide the necessary **soft and technical skills**, raising awareness, and cultivating an entrepreneurial mind-set for the **"agriculture of the future"** for young people and workers in the agri-food sector

4 main drivers

assessment of **skills requirements** and preparatory work.

cooperation and **networking** between the partners, with the aim of creating lasting partnerships.

Supporting innovation through **acceleration** and **open-innovation** programmes.

Developing of **innovative education and training programmes** in the field of intelligent agriculture and sustainable food systems.

Preparation of an **action plan** to ensure the **sustainability** of the project.

Project roadmap

Digital skills

Advanced data management and analysis: Enhance data interpretation and statistical analysis techniques

Digital entrepreneurship: Develop skills in online business creation, digital marketing, and e-commerce

Practical digital tools: Improve everyday and advanced digital communication skills

Green Transition and Sustainability skills

Resource efficiency and logistics management: Optimize resource use and improve supply chain efficiency

Regenerative and carbon farming practices: Implement advanced soil health and biodiversity techniques

Climate adaptation measures: Equip with tools for climate risk assessment and adaptation

Sustainable water and energy management: Minimize environmental impact through sustainable resource use

Soft skills

Problem-solving: Develop effective strategies for overcoming sustainability challenges

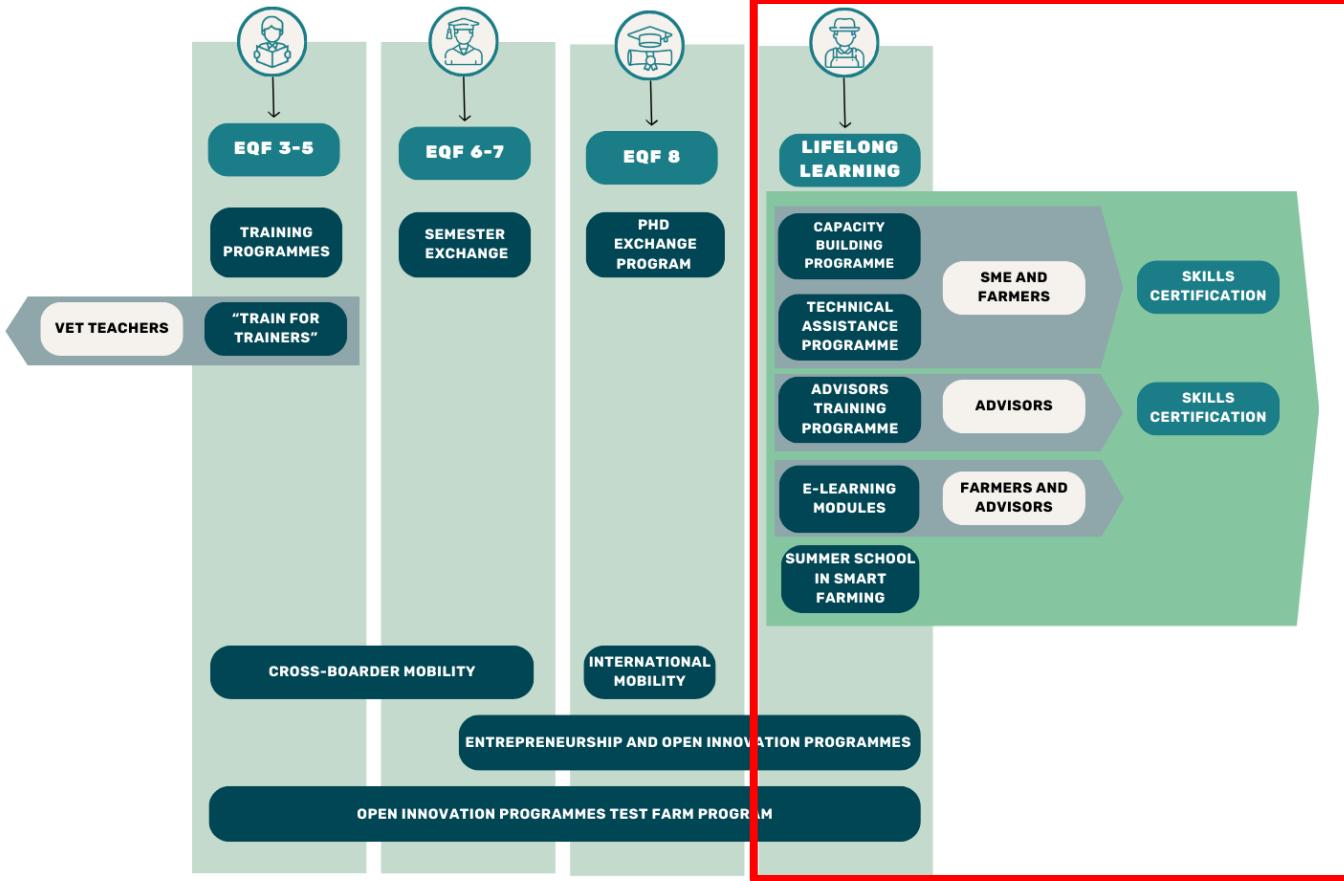

Effective communication: Facilitate the adoption of sustainable practices through improved communication

Teamwork and interpersonal skills: Foster collaboration and conflict management for sustainable practices

Activities of the Transnational Working Groups

To address the current challenges of the sector, it is necessary to raise awareness **across the entire supply chain**.

The recognition of skills acquired through **microcredentials** can be a lever for lifelong learning.

English remains a challenge for the sector, limiting access to European-level training

Need to build **networks** among the various actors offering **training opportunities** at the European level
