ORGANISATION OF ADVISORY SYSTEM IN POLAND

Agricultural Advisory Center in Brwinów

- The Agricultural Advisory Centre is responsible for providing training to advisors (VAACs) and for providing up-to-date information from competent authorities.
- It ensures the continuous updating of knowledge on agricultural developments, enabling VAACs to provide training and guidance to farmers.
- Improves the skills of staff at VAACs, employees of private advisory organizations, as well as educators from agricultural schools and institutions.
- Creates modern solutions for advisory services.

The idea of establishing a Practical Training Centre for Small-Scale Processing

The initiative of the Ministry of Agriculture and the Agricultural Advisory Center (Radom Branch) to establish and run the Center for Practical Training was based on the following reasons:

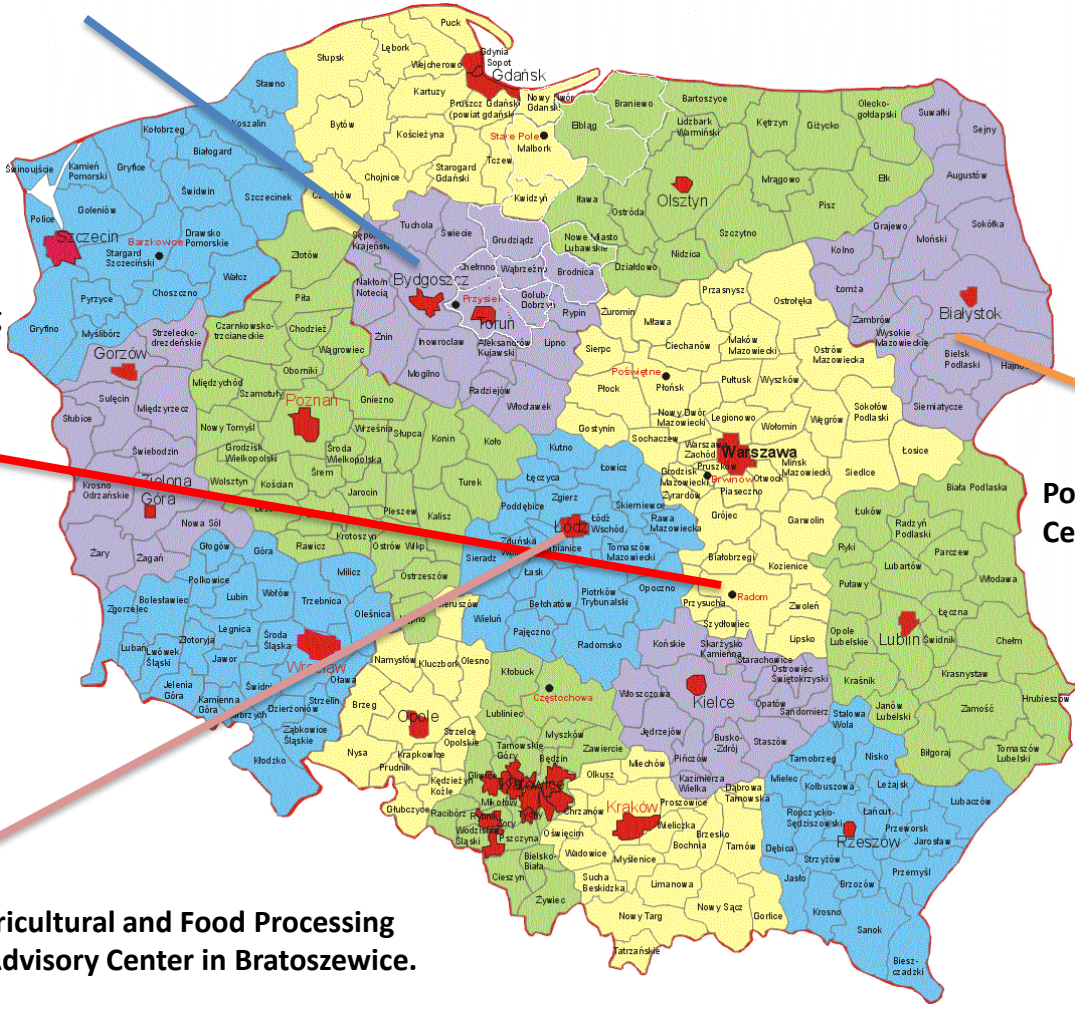

- In Poland, family farms are developing wide range of activities related to both primary and secondary production. These include investments in conventional and organic production technologies as well as in small-scale processing at the farm level.
- The expectations of farmers, who, while running their farms, also want to produce products in demand mainly on the local market, and to demonstrate practical possibilities.
- The possibility of carrying out this type of activity while maintaining standards that guarantee the safety of the food produced.
- The opportunity to produce traditional and regional products on a small scale using specific technologies and skills.
- The chance to prevent, or at least limit the capture of a large share of the added value by large producers and distributors

The Center of Culinary Heritage and Rural Tourism operates within the Kujawsko-Pomorskie Agricultural Advisory Center (KPODR) in Minikowo (2009)

Agricultural Advisory Center, Centre for Small-Scale Processing in Radom (2010).

Podlaskie Agricultural Advisory Center in Szepietowo (2017)

The Demonstration Center for Agricultural and Food Processing "STODOŁA" at Łódź Agricultural Advisory Center in Bratoszewice. (2023)

The idea of establishing a Practical Training Centre for Small-Scale Processing

Operation objective:

- Showing the practical possibilities to adapt the farm's resources to start and conduct "small-scale processing", so that it meets both hygiene and safety standards as well as legal requirements.
- Develop a unified approach and assist in the interpretation of legislation, veterinary and sanitary requirements related to small farm processing.

Description of the Center - decisions and certificates

The center has all the necessary permits required by law:

- Veterinary Inspection - meat processing,
 - Sanitary Inspection - fruit and vegetable processing, grain processing.
- and
- Certificate of Conformity of organic production for products of all owned plants.

Range of activities

The activities of the Center for Practical Training in Small-Scale Processing include the following:

- conferences, training sessions, workshops for advisory staff and individuals undertaking food production activities,
- study trips,
- technical demonstrations,
- Consultation and assistance with applications under the National Recovery Plan (KPO) and CAP 2023–2027.
- Fairs and promotional exhibitions
- Small-scale production

Participants

- Farmers 44%
- Advisors 21%
- Entrepreneurs and employees 16%
- Students of agricultural universities and schools 14%
- Representatives of rural communities (LAGs) and others 3%
- Representatives of local governments and agricultural organizations 2%

Cooperation with science and inspections supervising food safety

- Institute of Agricultural and Food Biotechnology – State Research Institute (IBPRS-PIB) in Warsaw;
- Warsaw University of Life Sciences (SGGW)
- University of Life Sciences in Lublin;
- National Veterinary Research Institute (NVRI) in Puławy;
- Veterinary Inspection (GIW);
- Sanitary Inspection (GIS)
- Agricultural and Food Quality Inspection (IHARS)

Examples of implemented projects/operations by CDR/WODR under RDP 2014-2020

Training projects with a national scope

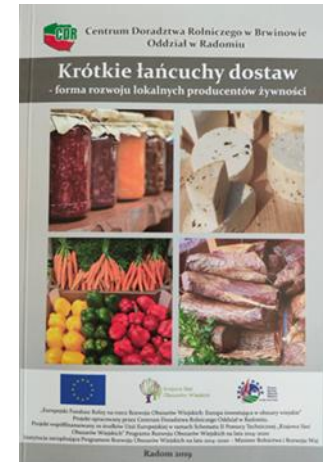

- Processing at the farm level, a condition for the diversification of the income of farming families (cereals, fruit, meat and milk) and the basics of direct sales (105 trainings for 2666 farmers);
- The impact of the smoking process of meat products and fish and fishery products on food safety (20 trainings for 676 farmers)
- Polycyclic aromatic hydrocarbons - assessment of the risk of exceeding the permissible PAH limits in smoked meat products (training for 217 farmers)

Processing at the Farm Level and Direct Agricultural Retail Sales

- A total of 280 agricultural advisors from 15 voivodeships participated in 12 training sessions. The training focused on establishing small-scale on-farm processing operations.

The Agricultural Advisory Centre is also involved in educational and training activities, including films, tools, applications, publications, and printed materials.

Summary

- Agricultural advisory units conduct various educational forms in the field of production and sale of food from a small-scale farms. Tasks carried out in this area are part of the "from farm to fork" strategy of shortening food supply chains - Short Food Chains - SFCs.
- The activities of advisory units have a significant impact on new directions of development of small farms, such as food production and processing on a non-industrial scale.
- In order to identify the needs and expectations of farmers in terms of the possibilities of selling food products, surveys were conducted throughout Poland. The study also covered the scope of the needs of institutional support for producers and consumer preferences regarding the organization of food sales on local markets and determining the level of consumer interest and satisfaction.
- In a market economy, there is room for all entities that are elements of the "food chain" - both large and small. However, only producers who meet the requirements and challenges of the market will succeed. Those who focus on food quality and safety, who can reduce costs and prove their due diligence in maintaining the level of quality required by consumers.
- Cooperation with scientific units and inspections supervising food safety is of key importance for the development of small-scale processing at the farm level.
